Initiating iEARN Clubs in Schools

**DATE:** SATURDAY, 3RD FEBRUARY
**TIME:** 10:00AM-02:00PM
**VENUE:**
Globe-the SIE Training Centre
22 Ali Bhai Centre, 233-A, Shahra e Qaideen,
Block-2, PECHS, Karachi 75400

**Who should attend?**
All subject teachers who are new to iEARN projects and want to establish iEARN clubs in their schools.

iEARN Online Projects are based on collaborative learning strategies, designed to engage students in meaningful technology based learning opportunities. iEARN School Based Clubs is an initiative taken by iEARN Pakistan to empower students to become part of iEARN Community and help them use technology in a meaningful way. iEARN School Based Clubs will focus on importance of online collaborative learning in education and ways to engage students in online learning.

The goal of this structured program is to equip students with latest technological skills, making them part of iEARN online projects and hence improving their academic output. It also helps educators integrate iEARN projects with their lesson planning and open doors to global collaboration.

**Workshop Highlights:**
- Introduce iEARN Projects and iEARN Collaboration Centre
- Discuss strategies of collaborative learning and explore ways to implement iEARN Projects in teaching and learning
- Provide assistance to new schools who want to initiate iEARN Clubs in their schools
- Provide support to schools in planning iEARN project activities for next six months.
- Share the updates and progress of iEARN project activities in schools and discuss successes and challenges.

We all know the importance of self-development but what is new in this workshop is that it identifies a well-defined process of self-development that is common to such different writers and thinkers as Maulana Rumi, Shah Abdul Latif Bhattai, Allama Iqbal, Sheikh Fariduddin Attar, Stephen R. Covey and William Shakespeare. The process is also linked with the seven stages of the soul and with our common heritage.

This workshop is not limited to one subject. It is a workshop where every teacher will find something of benefit to her or his subject, and every individual will gain insights into developing them. The highest point, we hope, will be reached when you as participant will discover that some of the things you already know are more valuable than you may have realized, and can be put to use so beneficially in a journey of improving oneself as well as the society we live in.

Who should attend?

School administrators, teachers and parents

**Workshop Venue:**
Globe-the SIE Training Centre
22 Ali Bhai Centre, 233-A, Shahra e Qaideen, Block-2, PECHS, Karachi 75400
SIE PROFESSIONAL DEVELOPMENT WORKSHOP

Learning through Animations

DATE: SATURDAY, 17TH FEBRUARY
TIME: 10:00AM-04:00PM
Venue: Globe-the SIE Training Centre
22 Ali Bhai Centre, 233-A, Shahra e Qaideen, Block-2, PECHS, Karachi 75400

WHO SHOULD ATTEND?
ALL SUBJECT TEACHERS OF PRIMARY AND MIDDLE SCHOOL LEVEL

Animation is one of the techniques that can be used effectively at any age level and with any subjects including Science, Social Studies, Math and Language Arts. It teaches students a variety of skills, from teamwork, to problem solving, critical thinking, and more. It's a new and innovative way to make learning fun and provide students with immediate satisfaction and a sense of achievement.

Objectives of the Training

During the workshop sessions, participants will:
- learn the entire animation process, including pre-production, production and post-production steps using technology.
- learn about more ways to incorporate Stop Motion into your classroom in a highly creative and very cool way
- find ways to engage students in creation of content-based digital animations to expand and deepen their understanding of classroom curriculum.
- learn to build self-confidence through making short animation projects, while learning new skills.

Language learning is a cognitive skill. We interpret our ideas and thoughts in terms of language. Our capability of playing with words and creating a new dimension always have given a creative approach to Language.

During recent years, a dialogue has been developed over approaches to structure effective lesson planning, implementing and teaching. In the Language classrooms there is always a room to innovate the learning process. Learners never enjoy the learning approach where they are given no liberty to experiment with their own language skills. In a language classroom we can use countless ways of expression which can help us in bridging the loop holes to make learning experience more effective.

In Activity based teaching workshop we will be focusing on the on a variety of activities that can aid the language learning process. The workshop will focus in the following skills:

- Increasing the motivation of learners
- Active teaching
- Designing and implementing Communicative Activities for Language Classrooms

Society for International Education
Community service is a voluntary activity that in some way benefits members of the community. Through this workshop we aim at enabling teachers to implement one of the most rewarding and high impact efforts for their communities by involving young people in service and service-learning. The first part of the workshop session will present the basic concept, strategic planning and curriculum integration of a school wise service learning program. Participants will be introduced to a structured framework to support the design and preparation of service projects lead by groups of young people.

Who should attend?

Social Studies and Science teachers, Project Coordinators, Project Managers, and other interested participants

Workshop Venue:
Globe-the SIE Training Centre
22 Ali Bhai Centre, 233-A, Shahra e Qaideen, Block-2, PECHS, Karachi 75400

17 MARCH (SATURDAY)
Time: 10:00am - 02:00pm
SIE PROFESSIONAL DEVELOPMENT WORKSHOP

Green Screen Effects in Media Making

DATE: SATURDAY, 7TH APRIL
TIME: 10:00AM-02:00PM
Venue: Globe-the SIE Training Centre
22 Ali Bhai Centre, 233-A, Shahra e Qaideen, Block-2, PECHS, Karachi 75400

WHO SHOULD ATTEND?
IT teachers, subject teachers, students and all other interested participants

PRE-REQUISITE: Participants should have some command over technology and experience in media making projects

The workshop focuses on using the technique of Green Screen to create videos, newscasts, commercials and digital stories. It also explores different ways to film and guide about ideal shooting conditions. Further, the workshop aims at guiding the teachers about different ways to integrate this technique in their classrooms to make it more interactive and unique.

The Adobe tools and applications can be used effectively to promote excellence in the classroom. The workshop will focus on introducing the Green Screen technique using Adobe Premier Software. It will also provide the participants with hands-on practice of the software and Green Screen technique using Adobe tools.

Effective Communication Skills

The ability of students to concentrate on learning and to communicate effectively has long been seen a challenge for most of the teachers. It is however, indeed the biggest desire of educators, parents and institutions to motivate the learners and help them develop this core skill.

Engaging students’ interest is not always straightforward, taking inspiration from Ken Wilson’s motivational techniques, the workshop will offer some hands-on and minds-on activities that the participants would adapt or adopt in their classrooms.

In order to achieve the desired goal to motivate the learners in classroom, the teachers need to revisit their sense of power they have in the classroom and relinquish too much control where possible. In doing so, teachers and students will earn from a shared learning experience.

The classrooms need to become less like a wheel where all the spokes lead to a center point, and more like a spider’s web. Though the teacher may ultimately remain the hub, the network has at the very least been widened.

It is expected that the proposed activities and strategies would motivate and inspire teachers to reappraise the very ways they themselves motivate

“Growth mindset” has become a buzzword when we talk about teaching and learning. But it is often seen that people’s understanding of this idea is limited.

Teachers can be powerful mentors to reinforce growth mindset principles and approaches in the youth they serve.

This workshop helps teachers build a mindset that leads to greater motivation and higher achievement. Through experiential and interactive activities, teachers can learn strategies to increase their own growth mindset as an educator as well as the youth in developing their mindsets by applying various STEAM (Science, Technology, Engineering, Arts & Math) based concepts

Who should attend?

ALL SUBJECT TEACHERS OF PRIMARY AND MIDDLE SCHOOL LEVEL

Workshop Venue:
Globe-the SIE Training Centre
22 Ali Bhai Centre, 233-A, Shahra e Qaideen, Block-2, PECHS, Karachi 75400
SIE PROFESSIONAL DEVELOPMENT WORKSHOP

Twitter in Education

DATE: SATURDAY, 5TH MAY
TIME: 10:00AM-02:00PM

Venue: Globe-the SIE Training Centre
22 Ali Bhai Centre, 233-A, Shahra e Qaideen, Block-2, PECHS, Karachi 75400

WHO SHOULD ATTEND?
ALL SUBJECT TEACHERS OF PRIMARY AND MIDDLE SCHOOL LEVEL

Twitter is an important tool that can be extremely helpful for educational purposes. Teachers and students from around the world can collaborate on projects using Twitter as a communication tool that simultaneously educates students in different classroom and cultural protocols.

This microblogging platform provides this opportunity to post short but powerful messages with enough information that is needed. Leading such busy lives, people do not have the time to read long text walls. They prefer to capture only the essence, and using Twitter in education helps you with that.

School management can use twitter as an effective marketing and promotion tool to connect with other people and businesses to share their educational endeavors, information and ideas.

During this workshop, facilitator will share useful resources to help teachers follow people who will be useful to them based on location, subject, grade level, and technology being used.
